DETAILED ACTION

Election/Restrictions

1. Claims 19, 21, 26, 30-32, 34-37 (elected Species III does not include a U-shaped clip or a means for crimping a split shot) are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/26/2004.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 33 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 33, the term "the circumference of the thimble" lacks positive antecedent basis.

Allowable Subject Matter

4. Claims 22-25 and 27-29 are allowed.

5. Claim 33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 2/11/2005 have been fully considered but they are not persuasive.

In regard to applicant's amendments and arguments concerning the terms "U-shaped clip" and "means for crimping a split shot", the Examiner contends that the Applicant originally elected Species III represented in Figure 3 which does not illustrate any U-shaped clip or means for crimping a split shot. The search for Species III did not require a U-shaped clip or means for crimping a split shot therefore claims in which these limitations appear were treated as non-elected claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pietrandrea et al. 5,557,874 discloses means for opening a split shot (13, 13a) and closing a split shot (12a, b); Brown 2,603,992 discloses an instrument for closing and opening split sinkers on fishing lines comprising means for closing split sinkers (jaws 24, 26) and means for opening split sinkers (jaws 28, 30 made relatively thin and are bent to cause the thin edges to align when closed).

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3643

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
